Take a Giant Leap Towards Uninterrupted  
Internal Communication

Effective internal communication is the cornerstone of operational success. Still, organizations struggle to fill the void created by the silo-centric setup, which hinders collaboration, innovation, and overall productivity.

The all-new BizPortals Communication Suite, utilizing a robust SharePoint SPFx environment, is ready to propel your internal communication strategy forward. Each web part in the package is perfected to meet the unique requirements of modern organizations across different sizes and industries.

# A Closer Look at the BizPortals Communication Suite

## BizPortals News

BizPortals News web part makes sure your employees have easy and timely access to relevant company information and news.

Display key company news, announcements, initiatives, events, projects, and more to help employees stay updated and engaged with organizational activities. Indeed, it is the easiest way to bring transparency and generate a sense of involvement among employees.

## BizPortals Bookmarks

BizPortals Bookmarks allows users to create and organize links to important documents, forms, modern pages, and more for timely access.

The robust bookmarking mechanism, while facilitating easy categorization of links, also offers simple drag-and-drop and search filters to quickly locate and highlight the important ones. Adding email notifications to alert employees of new bookmarks certainly amplifies the communication and collaboration efforts.

## BizPortals Employee Showcase

Reflect the modern approach of engaging with employees and enhancing employee recognition throughout the organization.

Now, you can mark significant milestones, like welcoming new employees and celebrating birthdays and work anniversaries, while encouraging employees to send personalized greetings. With integrated Azure Active Directory and Delve, Employee Showcase helps maintain data accuracy. You can also set specific timeframes to showcase past or upcoming events.

## BizPortals Chat

With BizPortals Chat seamlessly synced with Microsoft Teams, let your employees experience real-time messaging for uninterrupted communication and collaboration.

The 1:1 chat and group discussions or channels dedicated to specific projects, teams, and departments, along with the auto-refresh feature, allow team members to discuss tasks, share insights, ask questions, or quickly seek advice from their coworkers.

## BizPortals Calendar

Help your teams stay ahead of their schedules with the BizPortals Calendar webpart. Keep track of upcoming events, meetings, deadlines, and more for effective teamwork and resource allocation.

Let your employees manage multiple calendars and enable them to access past or upcoming events within a 60-day timeframe. Furthermore, the Outlook integration offers convenient access to event details like description, category, and attachment with just a single click.

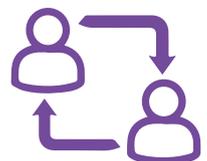

## BizPortals Headliner

BizPortals Headliners, a strategic web part in the communication package, helps organizations disseminate time-sensitive information and critical updates to the employees.

A dedicated space to publish articles, alerts, or notices ensures everyone stays informed about internal developments. Featuring multiple vibrant layouts and customizable interface, coupled with diverse content types, it serves as a valuable tool to boost internal communication, awareness, and engagement.

## BizPortals People Connect

Offer a truly connected workplace experience to employees with BizPortals People Connect, which ensures one-click access to coworkers' profiles and contact details.

Integrated with Microsoft Delve, it offers accurate and updated employee profiles along with their designation, skills, work history, and contribution, making it easy for employees to collaborate effectively.

## BizPortals Spotlight

Leverage a centralized hub to foster a culture of recognition and appreciation with BizPortals Spotlight, which helps organizations showcase events worth knowing about.

Share stories highlighting achievements and contributions of employees to affirm their importance and foster a sense of shared success. Leverage it to display welcome messages, upcoming events or meetings, and success stories for employees to align them with organizational happenings.

## BizPortals Ask a Guru

BizPortals Ask a Guru offers a dynamic workplace environment that fosters the idea of collective intelligence and cross-functional collaboration. It allows users to assign experts while allowing employees to post queries and seek solutions from them in a secure environment.

With role-based access to queries, status tracking, and email alerts, it creates a secure setting that encourages participation and collaboration on complex organizational issues.

## BizPortals Employee Directory

Leverage a dedicated employee directory to ensure your employees have access to updated information about their colleagues, including their email, phone numbers, departments, job titles, and locations- all in one place.

With interactive layouts, the inclusion of search filters, metadata integration, and customized fields, it makes it easy for employees to locate coworkers and share information across global boundaries.

Reach new heights of internal communication excellence with BizPortals Communication Suite, featuring a range of vibrant and customizable layouts tailored to your organization's branding.
